

KITCHENS THAT
WORK, BEAUTIFULLY

mackintoshkitchens.co.uk

MACKINTOSH®
INSPIRED BRITISH DESIGN

AN INSPIRED CHOICE

Welcome to the Mackintosh brochure. I'm delighted to introduce you to this stunning collection of high-quality kitchens, inspired by the design principles of its namesake – Charles Rennie Mackintosh.

Throughout the following pages, I'll be offering you a few thoughts and ideas to help you select and plan out a kitchen that will work perfectly for you and your available space.

There are three distinct styles within the Mackintosh Kitchen range: Shaker, Modern and Traditional. All of which offer the same level of craftsmanship, creativity and attention to detail; qualities long-associated with the Mackintosh name.

The collection offers a multitude of styles and design features, which may sound a little daunting. But don't worry, on page 6 you'll find an indispensable step-by-step guide to buying a kitchen which should help make the process easy.

With a kitchen range as eclectic and versatile as this, I'm confident you'll have no problem finding a kitchen that fits your individual tastes and lifestyle.

I hope you find the brochure inspiring and enjoy planning your dream kitchen.

George Clarke
Architect, Writer, Lecturer and TV Presenter.

PS You'll find even more useful information and videos on how to create your perfect kitchen at mackintoshkitchens.co.uk

INSPIRED BRITISH DESIGN

At Mackintosh we're very proud of our British heritage, not to mention our reputation for designing and manufacturing an outstanding range of durable, high-quality kitchens. All of which are made using the latest manufacturing techniques at our modern, purpose-built factory in Yorkshire.

But being British isn't just about geography. It's about having a forward-thinking attitude and a natural flair for ingenuity. Good British design has always set the trends and pushed the boundaries, which is something we strive to do with every kitchen we create.

Wherever we can, we use British components in our Mackintosh Kitchens. But to help ensure we maintain the highest possible standards, we also source materials from around the world. These are then combined and manufactured in the UK to produce a superior quality kitchen, backed by unrivalled customer service.

CRAFTED FOR THE INDIVIDUAL

Throughout his life, the designer, architect and artist Charles Rennie Mackintosh was influenced by a wealth of artistic forms. His genius was in his ability to cleverly unite these separate elements to create his own unique and modern style.

The Mackintosh philosophy now lives on through this inspired collection of kitchens, all of which offer a seamless combination of beauty, durability and effortless functionality.

True to their namesake, Mackintosh Kitchens are designed with a visionary flair and a meticulous attention to detail. Combining true British craftsmanship with contemporary design features, it's a range that not only looks stunning, but also meets the demands of modern-day life.

Individuality was important to Charles Rennie Mackintosh. In fact, few designers can claim such a unique and instantly recognisable style. Because we're firm believers in individuality too, every Mackintosh Kitchen comes with an inspirational choice of colours, textures, design details and finishing touches.

THE RIGHT WAY TO BUY A KITCHEN

The modern-day British kitchen is by far the busiest and most regularly used room in the home. With so many functions performed in it every day, proper planning and great design is essential.

The kind of space you have available, and how your family move around it will play a huge part in the overall design of your kitchen. You want it to look beautiful, but also work beautifully, to complement your way of living.

So take your time to browse the full range of Mackintosh Kitchens in this brochure, then follow these five simple steps to help you make the right choices.

STEP 1 IT'S ALL IN THE PLANNING

Getting a kitchen that's perfect for you and your family's needs takes time and plenty of planning, so don't try to rush this stage. Before you talk to any experts give yourself time to sit down and think about how you would like to use the space.

Ask yourself: what would be my ideal layout? Who's going to use it? How much storage do I need? What appliances do I want? What colours and textures do I like? Do I want an island unit and can the space take it?

Measure the dimensions, including where the doors, windows and services are located and make a list of exactly what you want and need.

STEP 2 ADD SOME EXPERTISE

Once you have the measurements and a rough outline of what you want, it's time to visit your local Mackintosh retailer to chat through your ideas with a designer.

They'll have the experience and design expertise to advise you on what will work and what won't, and will be able to turn your initial thoughts into something that not only reflects your personality, but supports and enhances your individual lifestyle.

STEP 3 DECIDE ON THE DOORS

Nothing defines a kitchen more than the doors. Depending on the design, you can create something elegant, rustic, eye-catching, minimalist or luxurious.

A Mackintosh Kitchen has dozens of traditional, shaker and modern styles available, in a range of gloss, wood effect, timber and painted finishes. All of which can be customised with an extensive range of handles. Or you can choose to go handle-less if you want a truly modern look.

STEP 4 LET'S TALK STORAGE

You should have already thought carefully about your storage. Not just what you need now, but also in the future.

By using your available space efficiently, it's surprising just how much extra storage you can create. Mackintosh units are available with all kinds of ingenious storage solutions such as the designer 'LeMans' corner unit, pull-out larders and internal drawers.

You'll find the full range of functional accessories, including lighting and shelving, from page 170.

STEP 5 WORK OUT YOUR WORKTOPS

Choosing a worktop is an important part of the design process and can change the whole look and feel of your kitchen. So it has to be right.

That's why Mackintosh offer a huge range of durable laminate worktops from Duropol, one of the UK's leading suppliers. They're available in a wide choice of colours and styles, and in 40mm and 60mm thicknesses.

There's also a unique range of curved worktops, designed specifically to suit the collection of curved base units.

MORE REASONS TO CHOOSE MACKINTOSH

THE MACKINTOSH 10-YEAR GUARANTEE

All Mackintosh Kitchens come with a 10-year guarantee to give you complete peace of mind when purchasing. It guarantees that for a period of 10 years from the date of purchase, your kitchen cabinets and fascias manufactured by Omega PLC are free from defects in material and workmanship.

Please ask your Mackintosh retailer for more details.

THE MACKINTOSH DEPOSIT GUARANTEE SCHEME

Mackintosh Kitchens' Deposit Guarantee Scheme offers you peace of mind and certainty when you purchase a Mackintosh Kitchen from any of our approved Mackintosh Kitchens retailers.

Should the retailer cease to trade before we have delivered your kitchen, we guarantee to supply your Mackintosh Kitchen furniture at the current manufacturer's recommended retail price, less the deposit paid, provided that the amount paid to the retailer does not exceed 50% of the manufacturer's recommended retail price.

ONLINE INSPIRATION

If you're looking for even more inspiration, look no further than the Mackintosh website www.mackintoshkitchens.co.uk. Here you'll find a great range of features to help you find and plan out the perfect kitchen for you.

As well as being able to browse our catalogues and an image gallery for every individual kitchen and accessory, our blog and inspiration pages are full of helpful, expert advice to help you make decisions that will work for your space.

You'll find an easy-to-use kitchen visualiser too, which allows you to try different combinations of painted kitchens along with a selection of handles, worktops, flooring and wall colours.

DESIGNED FOR YOU AND YOUR WORLD

Here at Mackintosh, it's not just the kitchen environment we care about. We're also committed to making our planet a cleaner, more beautiful place too. So naturally, sustainability is something that's very important to us. From the wood we use, to the energy we consume, to our transport and logistics, we take great care to ensure we're being environmentally responsible at all times.

We also like to make products that last. We believe that this is just as important for protecting the world's limited resources. To that end, Mackintosh Kitchens have been awarded FSC® Chain of Custody Certification, giving you the peace of mind that the materials used to make your kitchen have been sourced from responsibly managed forests.

We hope you enjoy this Mackintosh brochure. When you've finished with it please pass it on to a friend or recycle it. Thank you.

MODERN

UNDERSTATED STYLE

If you're drawn to the uncluttered, the unfussy and the understated things in life, you'll appreciate the subtle sophistication of the Mackintosh Modern kitchen range.

Combining contemporary design features and inspired storage solutions, you can create a clean, highly individualised space that works in harmony with your way of living.

"With the Modern range from Mackintosh, less is most definitely more. The chic, streamlined look creates a wonderful sense of space and balance."

IDEAS TO INSPIRE

Here's a few thoughts and design ideas to help you enhance your Mackintosh Modern Kitchen and make it your own.

SAVE OUR SURFACES

Modern-day kitchens offer a wonderful range of worktop options. In fact, they can be a design feature in their own right. So it's important to make sure your beautiful surfaces don't end up hidden under a layer of clutter. By maximising your space with clever storage solutions, you can create a clean, minimal look and maintain the functionality of your kitchen.

GO MONO

When it comes to colour, less is sometimes more. A modern, minimalist kitchen can be made all the more striking with an equally restrained colour palette – or even a monochrome one. The high-contrast look is very current, so you'll have no difficulty finding cookware, kitchen appliances and accessories to complement your scheme.

B

C

D

E

ATTENTION-SEEKING ACCESSORIES

There are some things that just cry out "look at me." Carefully chosen kitchen accessories, appliances or utensils can lift the whole look and feel of the room and inject some of your own personality into the space. And the wonderful thing is, you only need a few standout pieces to really bring your kitchen design to life and make it unique.

IDEAS TO INSPIRE

Here's a few thoughts and design ideas to help you enhance your Mackintosh Shaker Kitchen and make it your own.

A

GLORIOUS GLASSWARE

Whether it's clear, coloured, cut or frosted, there is something quite magical about glass. And because it's such a versatile material, there are plenty of ways to bring its unique and reflective beauty into your kitchen space. Such as contemporary glassware, glass-fronted cabinets, glass shelving, glass light fittings or even a glass breakfast bar.

B

C

BE COURAGEOUS WITH COLOUR

They say fortune favours the bold, so why play it safe with your colours and textures? Just a few vibrant accents here and there can produce some stunning effects. Try incorporating colourful throws or cushions into your design by creating cosy and inviting sitting areas that contrast with the plainer, more functional parts of your kitchen.

BRINGING THE OUTSIDE IN

Who says the garden has to stay outdoors? By introducing plants and flowers into your kitchen design, you can literally bring the whole space to life. Freshly cut flowers will add splashes of colour and a wonderfully natural aroma, whilst pots of fresh herbs look delightful on a windowsill and can add a new dimension to your culinary creations.

GOING WITH THE GRAIN

As far as finishes go, there is nothing quite like the warmth and natural beauty of wood. And these days we're spoilt for choice. From rustic, knotty oaks to luxurious, exotic walnuts and everything in-between. You can bring wood textures into your design through simple accessories such as wicker baskets, serving plates and storage boxes.

IDEAS TO INSPIRE

Here's a few thoughts and design ideas to help you enhance your Mackintosh Traditional Kitchen and make it your own.

GET A HANDLE ON STYLE

In a traditional kitchen, it's the details that make all the difference. Take the handles for example, they may seem small and insignificant but they can have a huge impact on the overall look and feel of the design. And with so many handle and door styles available, it's worth trying out different combinations before you make your final choice.

A TASTE FOR THE TRADITIONAL

If you're looking to create a country-style kitchen, you'll find an abundance of accessories out there designed in a vintage style. Stove-top kettles, coloured enamelware, traditional iron scales, earthenware jars, even the kitchen sink. Or if you want the real deal, start scouring those auction houses or antique shops to find those authentic hidden gems.

DESIGN FEATURES

EXPRESS YOUR INDIVIDUALITY

We believe your kitchen should be an extension of your personality. So we keep our styles flexible and offer a multitude of design options. This way, you're free to create something individual that suits your tastes and complements your way of living.

The door styles alone should give you plenty of inspiration. There's traditional, modern, shaker, natural woodgrains, painted, matt, high-gloss, all of which can be customised with over 75 handle styles. Whatever you look for in a kitchen, you'll find it here.

"Here's where the fun really starts. Choosing design options and adding accessories will give your Mackintosh Kitchen a personality of its own. Don't be afraid to combine and contrast shades and textures, mixing things up a little is a great way to break up the space and bring your kitchen to life."

RECOMMENDED CABINET COLOURS

Mackintosh painted kitchens can be supplied in 11 cabinet colours. Open and glazed units are also available in a choice of 11 painted colours.

ACCESSORIES

HANDLE SELECTION

CHOOSE FROM OUR DISTINCTIVE HANDLE OPTIONS

We have a wide range of handle suites available to help personalise your Mackintosh Kitchen. Not all handle suites are suitable for each kitchen. Most handle suites are supplied at no extra charge, however, a small number do carry a surcharge and your Mackintosh retailer will be happy to advise you on suitability and costs.

Please note that a handle suite may comprise up to three handles which are fitted to drawers and doors.

All handles fitted vertically unless stated.

ACCESSORIES

HANDLE-LESS SOLUTIONS

If you're looking for a minimalist kitchen, perhaps a kitchen that doesn't feature handles that can detract from clean lines and a sleek design, then Mackintosh has three ways to achieve this – Inset, Touch and Integral.

MACKINTOSH INSET KITCHENS

The principle of Mackintosh Inset Kitchens is that doors and drawers include a cup, fitted to the reverse, allowing them to be opened without the need of a protruding handle. This ensures a minimalist approach whilst maintaining soft close actions on doors and drawers.

To allow access to pan drawers, larder units and appliance housings, Inset kitchens are designed using horizontal and vertical extrusions, in a brushed steel finish. These not only provide a functional purpose but also work well with the range of doors available.

Inset can be used on a total of 56 doors, including all Sheer, Chic, Fresco, Metrica (all colours, except Gloss Black and Walnut) and Linear (all except Walnut).

MACKINTOSH TOUCH KITCHENS

Mackintosh Kitchens can be designed without handles using our Touch system. Doors and drawers are opened simply by touch, allowing you to create a minimalist, handle-free design.

Certain units, such as pull-out larders, appliance doors and magic corner units require a handle. A specifically designed handle suite (suite 653) is available to allow these units to be opened whilst still ensuring a minimalist design. Alternatively, a face-fixed handle could be used and we recommend the following handle suites - Suites 605, 610 and 700.

MACKINTOSH INTEGRAL KITCHENS

Integral kitchens are the third way to design a Mackintosh Kitchen without a handle. This style features an integrated J-Pull style handle grip (called J-Pull due to its shape).

The integrated grip of Integral has been specifically developed to be deeper than other versions, providing more grip and ensuring that opening dishwasher and larder doors is easier.

Integral kitchens are available in six gloss finishes (White, Ivory, Grey, Light Grey, Cashmere and Anthracite) as well as 11 matt painted colours.

ISLAND UNIT

An island unit adds extra surface space and character to your kitchen.

There's a wide range of units available in the Mackintosh collection, some incorporating traditional features such as decorative pilasters and other more modern selections utilising different heights.

DEFINING YOUR SPACE

Add innovative design features to your kitchen and increase space and function.

CHUNKY PILASTER

Adding decorative features like pilasters works beautifully with the traditional aspects of a Mackintosh Kitchen. A variety of designs are available to allow you total control over the look, feel and personality of your kitchen.

TRAY UNIT

A functional and attractive accessory available for all framed kitchens (excluding Shires), the unit houses two removable oak trays.

GLAZED UNIT

Make a feature of your wall units with a glazed front. Choose from a range of aluminium frames and glazing designs, with options to complement both traditional and more contemporary kitchens.

SEATING AREA

Add versatility to your kitchen with a casual seating area providing useful additional storage space.

WORKING MANTEL

Usually a feature of traditional kitchen designs, mantels make practical and attractive additions to your space and are available in a variety of veneered and painted finishes.

LARDER UNITS WITH OAK DRAWERS

There's a great range of larder and pantry unit options to complement your kitchen, available in varying heights, styles and complexities.

CURVED CORNER UNIT (internal version illustrated)

The alternative to the more standard L shape corner base unit, the curved version, with its sweeping lines, can suit both modern or traditionally-themed kitchens. They partner perfectly with our range of curved laminate worktops and are available in a selection of kitchens.

Linear (except group 0), Chamfered, Integral*, Timeless (all colours), Metrica (except Black & Walnut), Sculptured (all colours) and Painted Timber Shaker (all colours).

**please note that the curved unit used for Integral ranges is supplied with two doors.*

WICKER BASKETS

More suited to traditional kitchen designs, these wicker basket base units are ideal for larder-style storage. Available in all ranges.

EVERYTHING IN
ITS PERFECT PLACE.
EVERYTHING
WITHIN REACH.
EASY TO USE
AND ENJOY.

The fittings inside the kitchen units have a lot to say about whether you're going to enjoy cooking or not. If you have fast, direct and easy access to all the contents of all the kitchen units, then kitchen work becomes smooth, efficient and far more enjoyable.

This is ultra-important for corner units, which offer a lot of space but are often very difficult to access. One brilliant solution to this problem is the LeMans swing-out corner unit fitting from Kesseböhmer. A light touch swings the LeMans trays out of the corner individually, until they come to a stop with the contents right out in front of the unit. You can check the whole contents at a glance and easily reach any item you want.

Kesseböhmer storage solutions provide stylish, practical and functional solutions meaning better organised and easier to access storage space.

In addition to brilliant functionality, Kesseböhmer storage solutions stand for exclusive design and a high quality finish. Internal cabinet space is used more efficiently than conventional systems, helping you get the most out of your Mackintosh kitchen. Kesseböhmer stands for unparalleled user comfort and for a level of quality that sets standards worldwide. Mackintosh units are supplied with Kesseböhmer storage solutions pre-fitted, saving you time and money when installing (excludes Revolving Carousel Unit which is supplied ready-to-assemble as this is too large to supply rigid).

- 'Softstop' soft-close action is available on pull-out base units and larder units, incorporating Kesseböhmer storage solutions.
- Solid bottom shelves available.
- Greater load-bearing capacity than conventional systems.
- Greater level of usable space due to square edges on baskets.
- Unique LeMans corner storage solution – Red Dot Design Winner – providing full access to corner unit storage.

LE MANS PULL-OUT CORNER STORAGE

You'll certainly enjoy the aesthetic qualities of the LeMans fitting and the elegant movement sequence. The fluid sequence of movements is precisely defined and controlled by the fitting technology. It combines two types of movement – turning and swinging. The trays glide right out of the unit and back again in a series of supremely light and easy movements. The shape of the trays have been optimised to blend light and easy movements with a maximum amount of storage area. The flowing, asymmetrical curves make people think of the well-known race track in France – hence the name.

Easily loaded from the top, LeMans is the only corner cabinet solution to combine an extremely high degree of space utilisation with perfect overview, with the shelves swinging completely out of the cabinet. Not only will all pots and pans find their place – but every one of them can be reached easily.

Each LeMans shelf can be moved independently from each other enabling easy access, and can take a load bearing of up to 20kg.

Experience the design every time you reach for a pot or pan. The LeMans design was awarded the Red Dot Design Award in 2005 for outstanding design achievements.

THE FINE ART OF TRADITIONAL CRAFTSMANSHIP

Your cabinets will form the foundation of your new kitchen. So when you're looking for real quality, only a genuine rigid built cabinet will do. The hallmark of that quality is glue and dowel construction, giving you a cabinet that's built to last and leaving you no unsightly visible screws, fixings and drill holes.

As the kitchen can be an environment that has a lot of moisture in the air, it's also really important to make sure that any exposed edges are protected from potential water damage too.

This range gives you the option to add even more quality with features like adjustable shelving, soft-closing hinges and anti-tip fittings.

COLOUR CO-ORDINATED CABINETS

Choose from 11 cabinet finishes which allow you to colour co-ordinate or contrast your fascia style. A full range of matching plinths, panels and pilasters are also available which will add to the overall co-ordinated look.

BASE UNIT

- 18mm MFC glue and dowel construction, for no visible fixings.
- 15mm solid back panel for extra rigidity.
- Cabinets are edged all round for protection against moisture, even on the edges you can't see.
- Fully adjustable hinges with an integrated soft-close action.
- 50mm service void that aids installation.
- Concealed unit fixings.
- Adjustable and anti-tip fittings.
- Front-frame fixings are vertically and horizontally adjustable.

DRAWER UNIT

In addition to the standard base unit specification:

- Standard drawers feature a gloss metallic drawer side finish.
- 16mm MFC base.
- Suitable to bear up to a 40kg load.
- Fully extending soft-close runners with smooth and silent operation.
- Remove and adjust metal drawers and drawer fronts without tools.
- Handle-less drawer units feature factory-fitted trims.
- Crystal drawer sides are available at no extra cost, and a luxury oak drawer option is available too.
- Oak drawers have solid oak sides and dovetail construction with 9mm oak veneered base panel.

WALL UNIT

- 18mm MFC glue and dowel construction, for no visible fixings.
- 8mm solid back panel for extra rigidity.
- Cabinets are edged all round for protection against moisture, even on the edges you can't see.
- Fully adjustable hinges with an integrated soft-close action.
- Choose from 300mm or 350mm depth units (350mm depth fits a 12" dinner plate).
- Choose from three heights: 576mm, 720mm or 900mm.
- Concealed wall fixing brackets, 150kg loading per pair, which are wall-locking for safety, with a third bracket supplied to double-width wall units.
- Double-width units supplied with full centre division for prevention of shelf bowing and increased shelf-adjustment options.
- Glass shelves as standard for glazed units.
- Adjustable and anti-tip shelf fittings.
- Front-frame fixings are vertically and horizontally adjustable.

*Interior drawer lighting sold separately

GRASS® NOVA PRO
THE COMPLETE DRAWER
SYSTEM WITH PRECISION
AND INDIVIDUALITY

Easy to clean

Easy to remove

A quality kitchen needs to have quality built-in. Mackintosh Kitchens feature the Nova Pro drawer system from Grass®, one of the world's leading suppliers of quality drawer systems. A complete range of drawer systems are available – designed to provide functional storage solutions, combined with a smooth, soft closing action and other practical benefits.

Your Mackintosh Kitchen is provided with all drawers pre-fitted, saving you time and money on installation.

FEATURES & BENEFITS

- Grass Nova Pro drawers feature fully synchronised drawer runners requiring a very low opening force and providing an ultra smooth action. The drawer runners also incorporate a soft closing system providing reliable cushioning.
- Full extension drawer runners allowing full access 40kg load-bearing capacity as standard (more than conventional systems).
- Twin-wall, metal sided drawerbox with straight internal sides to provide more storage space and better compatibility with accessories.
- Solid 16mm bottoms to provide extra rigidity and reliability.
- Easy cleaning with flat sides and removable drawer front. The whole drawer is easy to remove in one easy movement – no tools, no hassle.

A range of solid oak dovetailed drawer boxes are also available as an upgrade. A range of functional accessories to suit both metal and oak drawers are available. Please see page 170 for details.

1

A PLACE FOR EVERYTHING

Mackintosh Kitchens are as practical as they are beautiful and a range of functional accessories are available, especially designed to allow you to customise your kitchen to your exact needs.

A wide range of cutlery trays and utensil dividers are available in either a plastic or luxurious oak finish. Combinations of trays and dividers are used depending on the width of the drawer and your Mackintosh retailer will be able to advise you on the possible combinations.

- 1. Internal drawer cutlery insert available in oak
- 2. 900mm top drawer with cutlery units

LINERO MOSAIQ MIDWAY SYSTEM

This stylish and functional midway rail system is supplied in one handy pack and features two 600mm rails, shelf, pot (with quiver), two utensil hooks and kitchen roll holder ensuring useful items are always to hand.

MACKINTOSH SINKS & TAPS BY
SCHOCK

This range of sinks and taps have been specifically developed with Schock, providing a comprehensive and stylish offer.

Schock is the world's leading supplier of granite sinks and the Neptune range is made from their outstanding material, CRISTALITE®.

Schock sinks are easy to clean, safe for use with food and are finished with Schock Antibac. The special hygiene protection uses natural silver ions to reduce bacterial growth by up to 95% and make working in the kitchen cleaner and safer. The range of stainless steel sinks from Schock are made from 18/10 grade stainless steel – the highest grade available – ensuring your sink is highly resistant to staining, rusting and corrosion.

MACKINTOSH SINKS & TAPS

† Ideal for mounting on a solid surface such as topp, wood or granite
* No diffuser supplied
** Requires a minimum 5 metre head or pressured system

ACCESSORIES

DUROPAL

QUADRA WORKTOPS

»

So, you have chosen your Mackintosh Kitchen, now you need to select the right worktop to finish your design. To help you, we have chosen a comprehensive range of colours to complement the Mackintosh range from the Duropal Quadra Worktop collection.

Duropal are a leading supplier of quality laminate worktops throughout Europe, and the Quadra range of worktops are an ideal alternative to solid surface, granite or timber worktops. The Quadra profile is designed to provide the appearance of solid surface worktops and the unique 'seal groove' ensures a lifetime of protection against moisture and steam.

These high quality, fashionable and durable worktops are resistant to: sunlight, scratching, abrasion, stains (such as coffee, tea, red wine, ink), fruit juice spills, steam and cigarette burns, and have achieved the FIRA Gold Award for product excellence.

To view displays of Duropal worktops, please visit your local Mackintosh retailer.

Unique 'seal groove'

CURVED WORKTOPS

»

A range of Duropal worktops have been designed specifically to suit our curved base end and curved corner units perfectly. These worktops have a totally flat-faced profile and are a practical and cost effective solution to solid surfaces and granite worktops. Curved worktops are available in both 40mm and 60mm thicknesses in all the colours.

GABLE ENDS

Available in all colours, in 40mm and 60mm thicknesses (where available), gable ends are an ideal way to create a peninsular island unit effect, or can be used as a stylish way to end a run of base units.

LAMINATED BACKBOARDS & UPSTANDS

Available in all colours, splashbacks and upstands are an ideal alternative to tiling, protecting walls from splashes behind hobs and sinks.

WORKTOP COLOURS

FREQUENTLY ASKED QUESTIONS

We understand the questions that are asked most about Mackintosh Kitchens. However, if you have a question that isn't covered here, please contact your approved Mackintosh retailer who will be able to answer your queries.

The kitchen is undoubtedly the most popular and widely used room in the house, and the various functions the kitchen of today is asked to perform, requires accurate planning and good design.

A good starting point is to look at the various ways in which your kitchen is used, how often and who uses the kitchen. This will then provide you with a list of basic design requirements for your kitchen that need to be met.

Where can I see displays of Mackintosh Kitchens?

Your local Mackintosh retailer will have a selection of displays and a full set of doors for you to view. We strongly recommend that you always view a display or sample door before purchasing your Mackintosh Kitchen.

What is the difference between a true rigid cabinet and a flat-pack assembled cabinet?

Mackintosh Kitchen units are true rigid units, assembled in our factory by skilled craftsmen using the latest technology. True rigid units are assembled using glue and dowel, rather than cam and dowel construction, ensuring there are no visible fixings or redundant drill holes. Mackintosh units are also supplied with doors, drawers and accessories pre-fitted and we even drill for doors and drawers for handle suite selection*.

* Applies to the majority of handles.

Do you charge for delivery?

No, we provide a FREE ** delivery, direct to your home and our two-man delivery teams will ensure your new kitchen is delivered with care and professionalism.

** Minimum order value required.

KITCHEN CHARACTERISTICS

Wood is a natural material with an endless variety of textures and grains. Variations evident on installation should diminish over a period of time to create a pleasant uniformity. As our policy is one of continuous improvement, we reserve the right to amend designs and specifications without prior notice. Where real wood veneers are used on external surfaces, we are unable to guarantee an exact match due to natural variations in colour and grain. The colours in this brochure are as accurate as the printing process will allow, and we recommend that you view a display or sample door at one of our approved retailers prior to purchase. Errors and omissions excepted.

What happens if I pay a deposit to a retailer for a Mackintosh Kitchen who then ceases trading before my kitchen is delivered?

In the unlikely event of this happening we run a Deposit Guarantee Scheme. This ensures that we will still supply your Mackintosh Kitchen furniture at the current manufacturers recommended retail price list, less the deposit paid on furniture, provided that the amount paid to the dealer does not exceed 50% of the manufacturers recommended retail price.

Can I buy direct from Mackintosh?

Omega PLC are the manufacturers of Mackintosh Kitchens and only sell via specialist retailers who will use their extensive knowledge and expert design skills to produce the kitchen of your dreams.

Do your kitchens carry a guarantee?

Yes, all Mackintosh Kitchens are supplied with a 10 YEAR GUARANTEE, providing you with complete peace of mind when purchasing your kitchen. Mackintosh guarantees that for a period of ten years from the date of purchase that the kitchen cabinets and fascias ("the products") manufactured by Omega PLC are free from defects in material and workmanship. Mackintosh Kitchens will supply replacement products for items that do not comply with this guarantee free of charge or, at our discretion, repair such products free of charge subject to our terms and conditions.

How long will it take for me to receive my Mackintosh Kitchen?

Once the retailer has placed the order with us, your Mackintosh Kitchen will be delivered within 2-3 weeks. However, Painted kitchens are available within 3-4 weeks from placing the order.

YOUR MACKINTOSH KITCHEN AT A GLANCE

We think it's important that you know what your kitchen is made from so we have listed below the material description. And, because we think kitchens should also look good on the inside our designers have recommended the best cabinet colour to use. You can also see here, at a glance, what design features are available for your new kitchen.
